#### DETAILED ACTION

### Election/Restrictions

1. Applicant's election with traverse of claims 1-12 and 16-17 in the reply filed on 04/21/05 is acknowledged. The traversal is on the ground(s) that the groups do not place a serious burden on the Examiner. This is not found persuasive because polymeric compounds can be prepared by more than one process.

The requirement is still deemed proper and is therefore made FINAL.

## Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The claims are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly

Art Unit: 1713

connected, to make and/or use the invention. The polymeric compounds of the claimed invention are not taught in a manner that would enable one of ordinary skill to practice the invention.

### Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. The factual inquiries set forth in *Graham* **v.** *John Deere*Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1713

- Claims 1-12 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoveyda et al., WO 02/14376 (hereinafter "Hoveyda") in view of Muhlebach et al., U.S. Patent No. 5,854,299 (hereinafter "Muhlebach"). Hoveyda teaches Ru complex of a 1,3-dimesityl-4,5-dihydroimidazol-2-ylidene and styrenyl ether ligand. See Hoveyda, Abstract; pages 2-4. Hoveyda further teaches that the Ru complexes are functional in ROMP polymerization reactions. See Hoveyda, page 7. present invention differs from Hoveyda in that Hoveyda does not expressly teach polymeric compounds containing the Ru complex. Muhlebach teaches, in analogous art, polymeric compounds containing products of cyclic olefins and ROMP complexes. Abstract; cols. 8-11. In view of Muhlebach, one having an ordinary skill in the art would be motivated to modify Hoveyda by introducing cyclic olefins in the presence of the Ru complexes. Such modification would be obvious because one would expect that the use of Ru complexes as taught by Hoveyda would be similarly useful and applicable to the ROMP process in Muhlebach.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D.

Art Unit: 1713

Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Fri, 10 AM - 8 PM.

- 8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
